

We, an agile developer team, develop, sell, and host a web application for test technology in the field of print products, which we make available to our customers as a SaaS solution. Good code quality is particularly important to us. The biggest challenge for us is to offer our customers the most timely and efficient use possible, while at the same time having a high volume of data and a very high level of sensitivity. Would you like to face the challenge and contribute your skills from day 1? Then we are looking for you!

Backend Web Developer (m/w/d)

In Full- or Part-Time with Immediate Start

Who we are

EyeC is one of the leading manufacturers of optical inspection systems for print inspection. With more than 70 employees in Hamburg and sales partners in over 25 countries, we work hard every day to ensure that our customers can guarantee the perfect print quality of their products. Our inspection systems are used by top pharmaceutical companies, printers, cosmetics, and food manufacturers in more than 70 countries. In this way we make a significant contribution to the topic of sustainability – of which you can also be a part. The key to our success: a strong culture of innovation paired with dedicated and highly qualified employees!

Your Responsibilities and Duties

- You are a part of our agile developer team that is responsible for the web application.
- As Backend Developer (m/w/d), you and your team are responsible for the main areas of algorithms and business logic as well as for interface technology.
- You undertake peer reviews through pull requests.
- You write and maintain unit tests to ensure compliance with functional requirements and quality.

TechStack & Technologies

- C#/.net6+, Eventstore, CQRS, Redis, Docker, Azure DevOps TypeScript, Kubernetes, Auth0, Nginx Ingress, Azure Cloud, Vue3, GraphQL, Rest, Grafana. Argo CD

Not a 100% match?

No problem! You can set the emphasis of your tasks and we are open to new ideas and impulses. Depending on your skills and interests, there is an opportunity to move to another area within our development team.

What sets you apart

- Desire to master challenges and to contribute yourself and your skills to a team
- Experience and/or a large dose of motivation to learn new things and to further educate yourself
- You are familiar with the Clean Code principles and good code quality is important to you

What you can expect from us

- A permanent employment contract
- Up to 100% home office possible
- Regular feedback meetings and further training opportunities
- Flat hierarchy in an open and innovative corporate culture
- A sympathetic cooperation along with many creative possibilities
- A very good transport connection and subsidization of the HVV- ProfiTicket
- Sports at the workplace and fun summer parties
- And all of that right in the heart of Hamburg!
