Print Perfection:

EyeC to Showcase Industry-Leading Print Inspection Solutions at Labelexpo Europe 2023

Hamburg, Germany, June 19, 2023. EyeC will be showcasing its latest inspection solutions for the print and label industry at Labelexpo Europe from 11 to 14 September 2023. At stand #8A64, visitors will experience live demonstrations of the innovative and fully automated systems. The Hamburg-based company focuses on automation, safety, efficiency, and sustainability. The system provider thus offers contemporary solutions and forward-looking approaches to current challenges.

Following a three-year break, Labelexpo Europe finally reunites experts and industry leaders from all over the world for one of the largest events in the label and packaging industry. Together with over 600 exhibitors, EyeC will present its innovative solutions, true to the trade fair motto "The Modern Legends of Print", inspiring technologies, and technological progress along the entire value chain for the printing industry.

Visitors to booth #8A64 can expect to see state-of-the-art print inspection systems for automated quality control. On display will be live demonstrations of the EyeC ProofRunner Web HighLight. The latest inline inspection system is installed on a rewinder from partner Rotocon and has been specially developed for 100% inspection of high-finish labels and flexible packaging in the premium segment. Thanks to unique HighLight illumination, the system quickly and reliably inspects the quality of complex finishes such as hot stamping, holograms or blind embossing. With the latest 8K color camera, the UHD extension mode offers the highest image quality at larger inspection widths without compromising production speed. Also on display will be the scanner-based EyeC- Profiler-DT line with various scanner sizes as well as the EyeC ProofText - a highly automated, web-based artwork proofreading system with an intelligent algorithm. The innovative tool detects and evaluates deviations from manuscript text, including content and font style, within a single process.

"Labelexpo Europe brings together some of the industry's most innovative and forward-thinking minds. We are looking forward to contributing our expertise and experience again this year, and to exchanging views on the latest trends, innovations, and concrete solutions in intensive discussions with partners and interested parties," says Dr. André Schwarz, Director of Marketing & Documentation at EyeC.

About EyeC

Founded in 2002, EyeC GmbH provides fast, accurate, and easy-to-use artwork and print inspection systems. EyeC is the only provider on the market that ensures product quality throughout the entire manufacturing process – from the first artwork file to the finished printed product. Products from EyeC provide users with 100% confidence about the print quality of their products, such as labels, folding boxes, package inserts, or flexible packaging. As a result, complaints, and recalls are minimized, production costs lowered, and quality testing optimized. Around the world, more than 2,300 EyeC inspection systems are currently in use at pharmaceutical companies, printers, and manufacturers of branded goods. The company currently employs over 70 people in Hamburg and has international sales partners in more than 100 countries.
