Sharper, Quicker, Better: The New Dimension of Print Sample Inspection with the EyeC Proofiler 1200 DT

Hamburg, Germany, May 21, 2024. EyeC GmbH, the global provider of automated artwork verification and print image inspection systems, announces the launch of the new EyeC Proofiler 1200 DT. In addition to technical improvements for optimized speed, handling, and ease of maintenance, the scanner-based inspection solution, with a fresh design, sets new standards in the quality control of large-format print samples. The EyeC Proofiler 1200 DT will be presented for the first time at drupa in Düsseldorf from 28.05. to 07.06.2024.

In line with its slogan "Sharper, Quicker, Better: Revolutionize Your Inspection with the New EyeC Proofiler 1200 DT", the new EyeC Proofiler 1200 DT delivers improved scanning technology. As part of EyeC's extensive DT product line, the system offers scan formats up to 1,778 x 1219 mm. The Proofiler 1200 DT sets new standards in terms of speed. Thanks to the further developed camera box with optimized lamps and a PC box with a 10Gbit network interface, the inspection system enables a scanning process of only 12 seconds at a resolution of 600 dpi. The redesigned scanner lid not only offers better and easier handling for the user but is also aesthetically pleasing thanks to its modern design.

The EyeC Proofiler 1200 DT is also characterized by further improved robustness. The use of high-quality glass reduces the number of air pockets that can affect the scan result; two coupled motors reliably prevent problems with the camera box. Optimized camera cable routing also ensures a longer cable service life and protection against cable breakage. The sealing of the side walls minimizes potential dust ingress to ensure trouble-free operation even in production environments. The EyeC Proofiler 1200 DT has been equipped with special service flaps to make maintenance easier and less complicated. A newly developed transport packaging also ensures safe and reliable delivery of the system with reduced resource consumption.

"With the new EyeC Proofiler 1200 DT we offer a pioneering solution in the quality control of print samples. We are proud that our most popular inspection system is continuously evolving to meet the increasing demands of our customers and to take printing and packaging processes to a new level," says Nico Hagemann, Director of Product Management at EyeC.

About EyeC

Founded in 2002, EyeC GmbH provides fast, accurate, and easy-to-use artwork and print inspection systems. EyeC is the only provider on the market that ensures product quality throughout the entire manufacturing process – from the first artwork file to the finished printed product. Products from EyeC provide users with 100% confidence about the print quality of their products, such as labels, folding boxes, package inserts, or flexible packaging. As a result, complaints, and recalls are minimized, production costs lowered, and quality testing optimized. Around the world, more than 3,000 EyeC inspection systems are currently in use at pharmaceutical companies, printers, and manufacturers of branded goods. The company currently employs over 70 people in Hamburg and has international sales partners in more than 100 countries.
