

EyeC Profiler Graphic Connect

SaaS-based Prepress Inspection for Labels & Packaging

Your Seamless Connection for Prepress Quality Control

The EyeC Profiler Graphic Connect is the all-inclusive inspection package for prepress. The system- and hardware-independent, SaaS-based prepress solution enables print-ready or step-and-repeat files to be compared against approved artwork files. Developed for cross-location and remote teams in the graphics and packaging industry, the system offers higher automation, process efficiency, standardization, and intuitive usability.

HYBRID
SOFTWARE

Seamless Workflow Integration

Seamless integration into leading workflow systems such as Esko Automation Engine or HYBRID Software, enabling fully automated quality control.

Flexible & Secure SaaS Platform

Secure, scalable SaaS platform for teams, offers remote access, real time collaboration, and system-independent flexibility – no need for local installation or maintenance. You only need a standard browser.

All inclusive Prepress inspection

Review of artwork as well as 1D and 2D codes in PDF files or step-and-repeat files, taking into account the specific requirements of the prepress process.

Perfect Print Quality Starts With Us.
