Date: 22 May 2026

Subject: Discontinuation of ProofRunner Web 450 / 550 / 760

## Reason for discontinuation

Dear EyeC Partner,

We would like to inform you that we will discontinue the sale of “old” ProofRunner Web series (450 / 550 / 760).

For almost 20 years, the first ProofRunner Web generation has successfully served customers worldwide as a trusted industry solution. We sincerely appreciate the strong relationship we have built with our partners and customers over the years.

As technologies and market requirements continue to evolve, we are now transitioning to our new product generation:

ProofRunner Web 450 / 600 / 800 Evo / HighLight / HighLight UHD.

This new generation provides access to the latest technologies, enhanced performance, and broader opportunities for future development and innovation.

Orders for “old” ProofRunner Web 450 will be accepted until *30 September 2026*.

Corresponding spare parts, service and technical support will remain available until *see list below*.

We recommend planning future projects and replacement requirements accordingly and transitioning to ProofRunner Web Evo / HighLight / HighLight UHD for new applications.

Our sales team will be pleased to provide advice and assistance where required.
